

Add OTP Authentication to Your SME Platform in Minutes

A Quick Guide to OTP Authentication

Used for:

New signups

User logins

Purchase confirmations

Password resets

The Challenge for SMEs

Even though OTP sounds simple, implementation can be tricky.

Limited technical resources

Not every SME has developers to build an OTP system.

Integration delays

Linking OTP across different channels can take longer than expected.

High operational costs

Managing APIs, Sender IDs, and routing can get expensive.

That's why many SMEs now choose turnkey authentication platforms that combine simplicity, speed, and scalability.

Meet Verif8: OTP Authentication Made Simple

Verif8 is a self-service, turnkey API for instant, multi-channel integration of user authentication. No extra software. No developer support. No waiting.

1

Generate OTP

Verif8's secure engine creates a unique code for each transaction.

2

Deliver Instantly

Send the OTP through SMS, Viber, or voice — whichever your user prefers.

3

Verify in Real Time

The user enters the code, and Verif8 authenticates it instantly.

Why Businesses Love Verif8

- ✓ Single API, full process automation
- ✓ Multi-channel support (SMS, Viber, Voice)
- ✓ Built-in analytics and reporting
- ✓ Enterprise-grade security
- ✓ Scales with your business
